

HACCP Solutions for Food Service

 **All Units Can be Calibrated! ***

Unique Hold Button - Take Accurate Readings by Removing Human Error

11025 Pocket Probe Thermometer

Waterproof

Reduced tip probe provides 300% faster response times
Thermometer can be calibrated
Water and grease resistant IP57 Rating -
Can be dropped into water
Temperature Range -40°C to 150°C

Slimline Infrared for Obtaining Temperatures in Hard-to-Reach Places

15030 Infra Red Hand Held

Instant non-contact surface temperature measurement
Useful with moving objects
Most accurate infrared thermometer in its class
Can be calibrated
Fully waterproof model also available!

Measure the Time to Heat and Cool Down Foods

26000 Heat/Cool Cooking Thermometer

Alarms when cooking or cooling temperature has been reached
Timer tracks cumulative cooking or cooling time
Easy to clean heat resistant teflon wire
Waterproof probe
Can be calibrated
Probe can be placed in oven
Attach with magnet or metal clip

Multi-Purpose Testing Suitable for Food and Dishwasher Temperatures!

15000 Flash Check Folding Probe Thermometer

Waterproof

Flash mode - automatically takes temperature reading and removes human error
Precision Accuracy
Double moulded construction to withstand tough conditions
Completely Submersible in water - IP67 Rating
Can be calibrated
Reduced tip probe for 300% faster response time
View Minimum and Maximum temperatures

The Smallest Infra Red Device! Perfect for Spot Checks

15031 Mini Trace Infra Red

Light-weight and compact design
Similar size to a car key
Instant and Accurate Temperature Measurement
Automatically displays time when not measuring temperature

* This unit cannot be calibrated
